

Bradley Glonka

The guru of bits and bytes and a master of geek speak, Bradley Glonka has spent over 15 years sharpening his information technology expertise. More than just a “computer guy,” Bradley excels as a highly accomplished IT professional. Demonstrating full command of IT and business space, he successfully launched an E-commerce start-up business, quickly reaching \$1 million in revenue in its first full year of operation.

Bradley has been tapped to lend his broad scope of experience to a diverse collection of industries, from telecommunications, marketing, and news and information media to fulfillment, mortgage banking, and default loan servicing. Bradley’s mastery of the IT field has also enabled him to mesh his proficiency with the needs of the legal arena; automotive, manufacturing, and engineering industries; the emerging Linux technologies and community; as well as software development.

Called on for his keen ability to turn business operations into technical solutions, Bradley has proven his adroitness at understanding more than just the inner workings of machines and the gobbledygook of tech language. With a knack for identifying how technology can be implemented to reduce operating expenses and increase productivity, Bradley’s shrewd interpretation of the marriage of business and technology has made him a precious commodity.

Highly praised for his ability to translate tech talk while instructing all manner of individuals, Bradley has trained C-level executives and entry level employees alike. His broad scope is further proven as he utilizes his knowledge of specialized technologies to design, execute, and maintain highly sophisticated IT systems and exceptionally advanced and effective applications.

Business cannot function without technology and, from B2B to E-commerce systems, Bradley has finessed the internal and external needs of companies through his extensive experience in web-based communications and information exchange systems. He has built and implemented technology infrastructure from the ground up, supervising both people and systems effectively.

Bradley earned a master’s degree in business information technology and holds an undergraduate degree from Wayne State University. The consummate professional, he is also a part-time grown-up, raising sons Jack and Nick with his wife in Detroit and spending the remainder of his free time snowboarding, sailing, kite-surfing, and boasting about his title of “biggest kid in the neighborhood.”
